Hi Kathleen,

No problem! We'll keep the walk-through as scheduled for 12PM. We'll see you then.

Best,

Michelle

Thank you, Grant.

Michelle- excited to work with you!

We unfortunately have a walkthrough scheduled quite a distance drive time right after our visit with you tomorrow, and are on a very tight timeline.

Do you think there is any flexibility with keeping the start time to 12:00noon? I'm so sorry!

My cell is +12029411109

Kindly, Kathleen

Hi Grant,

Appreciate the quick call. Let's meet at the Wolfe Reception Center on Sunday 8/15 at 12:00pm... then we can take a look at the various paths of travel, arrival/departure locations, and meeting spaces. The address you can input would be 2 Apple Park Way, Cupertino, CA 95014. In the mean time, let us know if there's anything else we can assist with.

Hi there! Hope all is well. Just flagging this in case it's of interest. This news is out this a.m. Would love to catch up soon on what you have coming up and what is of interest from Apple on our environmental efforts.

Read out: EPA Administrator Regan visited Apple Park for the first time to tour the site's clean energy and sustainable design yesterday and to discuss climate action with Lisa Jackson, former EPA Administrator and head of Environment, Policy, and Social Initiatives at Apple. This is their first public sit down since the new Administrator took office, and as the two first Black Administrators of the EPA, they also discussed their views on environmental justice and racial equity following Apple's Impact Accelerator announcement.

# Transcript:

Lisa Jackson: Administrator Michael Regan. Welcome to Apple park. We're absolutely thrilled to have you today, And happy to show you just a little bit of Apple Park, including my home away from home the rooftop — and you can attest to the fact that I don't spend all my time there — but welcome to Apple Park.

Michael Regan: Well, thank you so much Lisa and the little bit that you showed me is a lot. It's amazing to see what's happening here in Apple park. So thank you all for, having me.

Lisa Jackson: Oh, absolutely. You know, it's kind of a important time to be here with everything, going on in the world of climate change and the IPCC report last week.

Michael Regan: It is. I think the IPCC report is really paying a stark picture for us. The science is clear. So we're excited that the president has a vision for how we adjust, and I think EPA is excited about the role that it plays in finding solutions for the IPCC results.

Lisa Jackson: So, tell us a little bit about your priorities and how EPA is tackling obvious change it challenges of climate change, but there are other environmental challenges as well, I'd love to hear about it.

Michael Regan: There are, and as you know — far too well — we have to walk and chew gum at the same time. And I'm proud to say that we're picking up and building the legacy that you left at EPA. We do have a number of priorities, but all of them are centered around environmental justice and equity. Climate is one of our biggest issues obviously, but water pollution and water quality are on the radar, and so is air quality. While we tackle the climate crisis and think about protecting this planet and public health, we don't want to lose sight of our core mission, which is to protect public health with water quality — drinking, good quality, drinking water — and air quality, as we know there are so many health impacts from a lot of these stationary mobile sources, and so we're walking and chewing gum at the same time.

Lisa Jackson: Wonderful to hear because, of course, for many families pollution affects them every day. In addition to the climate change that's affecting us all, there's air pollution, water pollution. Isn't it our right as Americans to access clean, air, water, and land?

Michael Regan: It is. It is, and I'm happy to say that we do have a central role in the President's vision to combat climate change and, as, you know, when we think about the role of EPA, it's an honor to be so central to this mission, looking at how we reduce the emissions of HFCs — which are highly potent greenhouse gas emissions. Central to the President's executive order, looking at 50% of vehicle sales by 2030 being electric vehicles. We've got a rule making role there. Tackling the challenge of methane in September we're going to propose a rule that regulates methane emissions from both existing and new sources. And then we have to revisit how we reduce the emissions from our coal plants as well. So we have a full agenda on the climate — on the climate stage, but again, we're not losing sight of the opportunities for water quality and air quality as well.

Lisa Jackson: Now, we were talking a little bit earlier during the tour about the importance of infrastructure, and, of course, EPA is also really engaged in the discussions around the infrastructure package in Washington D.C. Talk about issues that affect every American — what's going on with the infrastructure.

Michael Regan: You know, the infrastructure package is historic. This is a great example of bipartisan or bipartisanship working the way it should work. And for EPA it's especially sweet because there are significant resources that go into some of our core programs. Over 50 billion dollars in water infrastructure, 7.5 billion dollars in EV infrastructure, you know, looking at over 21 billion dollars in cleaning up legacy pollution, much or many of those pollutants impact our environmental justice community. So this is a significant opportunity, not only for the American people and for job creation, but for people to really see what EPA can do.

Lisa Jackson: I love that you describe it as an opportunity. I mean, these are challenges that need to be addressed when it comes to clean water, but you see it as an opportunity. Tell us about that opportunity for America.

Michael Regan: You know, I do. Most people think about these inconveniences as sacrifices. We see them as significant opportunities. Significant opportunities to tackle some of the biggest environmental issues that we face. But we also have an opportunity to use it as a rising tide. So I'm really excited about the resources that are being invested, and quite frankly I'm excited about the ability to leverage those

resources with our public and private partners. Which is where you and Apple come in. So talk to us a little bit about the importance of the public and private sector working together.

Lisa Jackson: Yeah, it's it's incredibly important. You know, I'll give you a real world example. We were really proud at Apple to be, I think, the first US company to endorse the clean energy standard that's part of the infrastructure discussions. This idea that we really need to show leadership and give a strong and clear signal that all of our energy generation in this country would be 100 percent carbon free by 2035. When business hears that we know how to invest, we know that the investments we're making are going to continue to pay off — not just financially, of course, but for the planet, for our future. So, you know, I've always said that people protect our planet, but businesses more than ever have a role in making sure that our voices are heard in supporting smart forward-looking public policy. That's part of, you know, what I see is our role here at Apple.

Michael Regan: Well you've always been a leader in this space, before Apple, and now that you're at Apple, you're helping to continue on that trajectory. When we think about the goals that Apple has — the carbon neutral goal in supply chain by 2030 — Lisa, that's a huge, huge issue to tackle. How are you going to do that?

Lisa Jackson: No it's big, but we can do it. We can all do it. And I think what Apple is doing is important and shows leadership, but we did it for just that reason. Look, Apple's carbon neutral now. You saw this facility, but we have stores all over the world, we have data centers all over the world, including your home state of North Carolina -- very proud of that. They all run on 100% clean energy. So, we're carbon neutral today as a company. Many companies need to get there and that's great. We asked ourselves what more we could do.

And so, we looked at our supply chain. We consider their carbon emissions part of our carbon footprint. So we said, you know what we should do, we should get every one of our suppliers to be carbon neutral for their Apple production — to use 100% clean energy wherever possible. And we have over 110 and counting suppliers who've agreed to be 100% clean energy for their Apple production — that's 8 gigawatts of clean energy, coming online over the next few years, all to support this idea that this transition can't be without business — in fact we we should be leading it. It needs to be based on innovation.

There are jobs and opportunities underlying all of that. And you know, I feel like from where we both sit, in very different seats, we both have to push as hard as we can to make this transition happen for all of our collective futures.

Michael Regan: It's an awesome opportunity, and I think you have hit the nail on the head in terms of how we work from our different spaces. It makes it so much easier for us to make our policies and our regulations relevant when the private sector leads, and obviously Apple is a leader amongst leaders, and we're really glad to see that happening.

Lisa Jackson: Thank you. That's nice to hear. I want to hear you talk about something that we've been talking about the whole time you've been here, which is environmental justice. I know it's important, I know you've set it as a priority. Talk to us a little bit more about what that means, why, and how you see land out as administrator

Michael Regan: listen, I think that one of the more exciting things about this administration was the President's pledge to focus on racial justice and equity. And so it's made it a little easier for us at EPA quite frankly to pick up where you left off with a very laser focus on environmental justice and equity. From the very beginning I asked all of my senior leadership team to give me a full accounting of how environmental justice and equity fits within the regulations, the policy, the contracts, and the procurement, as well as enforcement. So, there is accountability internally at EPA. But we're lucky because there have been resources to complement that level of focus. The American risky plan gave 100 million dollars to focus on environmental justice and air quality monitoring. The president has asked for a 20% increase in EPA's budget, which is monumental. And a significant portion of increase will be

dedicated to environmental justice and equity. And then, as we look at the bipartisan infrastructure deal, all of the resources that will be invested into our communities, the president has a justice 40 initiative. 40% of those investments that go into those communities will stay in those communities. In the form of jobs, economic development as well as opportunities to reduce pollution.

So I've often said that environmental justice is a centerpiece of this administration — E. J. Is part of EPA's DNA, and we are very, very serious about it.

Lisa Jackson: I like that — EPA's DNA. That idea that the community that so often bear the burdens, should now bear some of the, the progress — should be recipients and beneficiaries, should see those jobs. I think that's so amazing. Congratulations, and thank you for your leadership in that area. It's Time.

Michael Regan: It is time, it's long overdue, and I've traveled all across the country — Detroit, Flint, Durham, North Carolina, Milwaukee, it's long overdue. And the good news is now that the resources are flowing to the agency, there have been solution on the ground for decades.

So I can't tell you enough, how much of a privilege it is, to again pick up where you left off. It's not lost on me that I'm sitting here having this conversation with the first African American EPA administrator, and so we feel a sense of responsibility to continue that that legacy that you started.

Lisa Jackson: Oh, it makes me happy to know I'm not the last. And you won't be the last either. These issues are important to our community, they're important to all communities, really. So, just keep on doing the great work you're doing.

Michael Regan: Absolutely.

So, talk to me about how you are carrying that environmental justice legacy from EPA to Apple, and what does that look like — What does that look like in the seat that you're in now?

Lisa Jackson: You know, it's interesting because of course, your responsibilities are awesome and so vitally important. You're setting the policies, you're making sure that our government works for us — works for all Americans. And there's no more sort of sacred responsibility than that. So let's always remember that. But here on the business side, that doesn't mean we stand by and watch you do it and say 'hey, hope that works out for you.' You know, what we asked ourselves what we could do in furtherance of the kind of justice you're working for. And so we approached it from the business side of the equation, and actually, just today, we announced our first class of what we call Impact Accelerator businesses. It's 15 business leaders who are Black and Latino and Indigenous people — so Black and brown communities, but they've started their own businesses. We'd like to be able to do business with them. We want them to grow to the kind of scale, where Apple — or companies anywhere in the country, and the world, for that matter, can hire them, can pay them, to work on clean energy, on the efficiency, on recycled materials. There's huge opportunity in recycling as you know, and resources, on cleaner processes and chemicals, on logistics.

And so these 15 business owners will go through our first — their very first, class of Impact Accelerator businesses. They'll get training, they'll get Apple experts as mentors, they'll be the beginning of an alumni network. And almost certainly, some of them will be Apple contractors in the near future. So, what we are trying to do is add to and help grow the kind of businesses that you are now hoping to fund around the country. And we're really excited about the opportunities that we might be able to create. The economic empowerment that comes from owning your own, and you know, doing good in the world.

Michael Regan: I'll tell you, it's exciting. It's ambitious. It's innovative. It's exciting. And I think we should not lose the opportunity to continue to highlight what you just mentioned, which is it's a false choice to think you have to choose between environmental protection and economic prosperity. They go hand in hand. Tons of jobs associated with it, as well as being globally competitive. So, it's exciting to see you do that work from the seat.

Lisa Jackson: Thank you. Well, it's not as exciting, and not as cool as being able to sit here with you today. I wish you all all the best. I know the EPAs in wonderful hands but more importantly I know the country and our health — our environmental health and the health of our families is in good hands. So keep up the great work

Michael Regan: Well thank you Lisa. Looking forward to continuing the partnership.

Lisa Jackson: Absolutely.

Thanks! AP and Reuters are a pass on my side. Reuters will usually do something but I think he's out of the office.

We'll do a light touch pitch to those outlets and say we'd love to explore something with them around both of their voices if that sounds good. Can copy you, Tim?

Thoughts below.

On Aug 18, 2021, at 10:50 AM, Carroll, Timothy < <a href="mailto:Carroll.Timothy@epa.gov">Carroll.Timothy@epa.gov</a>> wrote:

Thanks Nick! We can definitely pitch to WaPo, NYT and E&E. I don't have strong connections at Grist or GreenTech Media but I'm happy to reach out to reporters there.

Great, if you don't mind.

For the outlets where we can double up, which reporters are you hitting? We've got our enviro reporters at Reuters, AP and Politico but want to make sure we're aligned and not sharing the same story with different reporters (or following up with different reporters if initial outreach falls through).

Reuters and AP - tech beat reporters (Stephen Nellis and Mike Liedtke). Politico - Zack Coleman (haven't heard back)

One more thought that Jamie mentioned: is there any interest in pitching to other non traditional/digital outlets like Refinery29 or Teen Vogue? Might be more of a stretch to land but could be cool with the photo/video components we have here!

Like it! We have some good connections there or happy for you to pitch them. We've found they need a little time with this kind of thing but doesn't hurt to send to them and see what they can do. It's really cool! Maybe we could offer them another convo with both Lisa and the Administrator too to sweeten the deal.

Hi there!

We are looking forward to the visit. You can share with us as a PDF and we will load it up. We will also have this outline of the conversation at a high level in a PDF on the iPad for them both so they are not having to read from the iPad and have the same reference points. Let us know if you have any concerns with this:

Introduction and brief recap of AP tour

- Shift to urgent need for climate action following IPCC report looking ahead to COP
- Lisa asks Administrator Regan about EPA's priorities under his leadership
- Administrator Regan discusses infrastructure package and asks Lisa about public/private sector action
- Lisa discusses how Apple engaged has engaged on policy pointing to support for a Clean Energy Standard and SEC disclosure
- Administrator Regan asks Lisa about Apple's 2030 goal
- Lisa asks Regan about importance of environmental justice as a priority for EPA
- Regan discusses EPA EJ efforts and asks Lisa about how Apple is thinking about this
- Lisa discuss EPA EJ efforts, and now Apple efforts and our Impact Accelerator announcement

We are hoping having an outline to reference will ensure we cover all of the topics while keeping the flow more natural. We can also pause if we need to do a redo/retake any questions at the end to make sure we've hit all of your points.

Thanks. Keri

Happy to help.

Sharing some key highlights of our environmental progress:

- 100% renewable electricity: We continue to source 100 percent renewable electricity for all offices, retail stores, data centers and co-located facilities in 44 countries. 90% of the renewable energy is sourced from Apple-created projects.
  - Carbon neutral operations: Beginning April 2020, Apple is carbon neutral for our corporate emissions.
- Carbon footprint: We've committed to carbon neutrality by 2030 and to reducing emissions by 75% from 2015 levels —so far, we've reduced our comprehensive carbon footprint by 40%.
- Disassembly: Our "Daisy" robots disassemble iPhone devices to recover more material inside. Our newest robot, "Dave," disassembles modules like the Taptic Engine to enable recovery of materials like rare earth elements and tungsten.
- Elysis: In May 2018 aluminum manufacturers Alcoa and Rio Tinto announced a joint venture, partially funded by Apple, to research and develop a new technically that eliminates greenhouse gas emissions from the traditional aluminum smelting process. In December 2019, we announced Apple had bought the first ever commercial batch of carbon-free aluminum, which is currently under development on the 16-inch MacBook Pro.
  - Energy consumed by Apple products: In 11 years, we've reduced average product energy use by 73%.
- Green bonds: We've issued \$4.7B in green bonds. Most recently, we issued USD \$2.2 billion in November 2019, dedicated to helping achieve our carbon neutral goal. Apple has allocated more than half of its total Green Bond spend \$2.8 billion.

- Low-carbon design: We decreased our 2019 carbon footprint by 4.3 million metric tons by increasing efficiency and using recycled and other low-carbon aluminum in our products.
- Packaging: 100% of the wood fiber in our product packaging is recycled or comes from responsibly managed forests; and since 2015, we've reduced plastics in our packaging by 65%. We plan to eliminate plastics in our packaging by 2025.
- Recycled rare earth elements: All iPhone, iPad, Mac, and Apple Watch devices released in the past year are made with recycled content, including 100 percent recycled rare earth elements in the iPhone Taptic Engine a first for Apple and for any smartphone
- Recycled content: MacBook Air with Retina display (2020) is made with more than 40 percent recycled content, including 100 percent recycled aluminum in the enclosure.
- Refurbish and recycling: We sent 10.4 million devices to be refurbished for new users in 2020, and we directed 39,000 metric tons of e-waste to recycling globally.
- Smarter chemistry: For the third year in a row, the Mind the Store campaign, by the NGO Safer Chemicals, Healthy Families, gave Apple an A+ rating for our work to eliminate harmful chemicals in products and packaging.
- Supplier clean energy: Over 110 suppliers have committed to 100 percent renewable electricity, with nearly 8 GW of clean energy commitments, of which 4 GW is already operational. Our new goal is to transition 100% of our manufacturing supply chain to 100% renewable electricity by 2030.
- Water: In 2020, we helped 172 suppliers conserve more than 10.8 billion gallons of water, bringing the cumulative savings since the launch of our Clean Water program in 2013 to 41 billion gallons.
- Worker safety: We've enrolled 100 percent of supplier final assembly sites in our Safer Cleaners program, impacting more than 80,000 workers. In 2020, we were the first consumer electronics company to receive the EPA Safer Choice Partner of the Year Award for the use of safer process chemicals.
- Zero waste: We've achieved Zero Waste to Landfill certifications at all supplier final assembly facilities for core product lines. In fiscal year 2020, we diverted more than 70% of waste across Apple facilities including retail stores. We have active Zero Waste to Landfill goals for retail, corporate facilities and our supply chain.

Highlights of Apple's campus that we plan to note as part of the visit include:

- There are EV charging stations located in the underground parking structure, and additional charging stations located in the aboveground parking structures on the south end of campus.
- In addition, there are 1,300 bicycles provided for employees to get around campus, and a fleet of EV carts that are used by the Landscaping, Security, and Maintenance teams.
- Caffe Macs provides food and beverages to Apple Park's 15,000 employees. Food and beverages are provided in compostable containers, and waste is managed towards Apple's zero waste goal. Each office area includes recycling and compost bins for employees to participate in the effort towards zero waste. Overall, 70% of waste generated at Apple facilities is diverted from landfill.
- The natural ventilation system brings fresh air from outside in through the canopies that gently shade the interior and exterior windows. This highly innovative design significantly reduces our energy usage. Temperature is maintained at a comfortable range of 68 to 78 degrees Fahrenheit. The building can be put into mechanical airconditioning mode on hot days or during other circumstances.
- The massive retractable glass doors in this section are the biggest of their kind ever constructed; they can be opened to allow additional fresh air to circulate through the building.
- As of April 2020, we are carbon neutral for our corporate emissions, including emissions from all of our facilities, as well as employee commute and business travel.
- Apple Park relies on 100% renewable electricity. At Apple Park, electricity is supplied by a large 17MW array of solar panels, here on the roof of the Ring Building as well as large arrays on the aboveground parking structures on the south end of campus. Energy is stored in a series of Bloom Energy biogas fuel cells, with a 4 MW capacity, located adjacent to the south parking structure.

- Apple Park offers over 120 acres of green space, with numerous pedestrian and bike paths. Apple Park was designed to recognize the heritage of the land and the many kinds of landscapes in California. There are over 9,000 native and drought-resistant trees planted throughout the campus.
- Apple Park has nearly three acres of fruit trees more than 800 trees in total. The 24 varietals include plum, pear, apple, cherry, apricot, and persimmon. The fruit is harvested 6 months of the year and used in the meals made at Apple Park's main restaurant, Caffe Macs.
- Apple Park is also home to over 150 different species, including lizards, hawks, and rabbits. Apple has a partnership with the Wildlife Center of Silicon Valley in case of an animal in need of wildlife rescue.
- Thousands of shrubs and ground-cover plants are planted across the campus, representing a wide variety of drought-tolerant and California-native species.
  - 54% of Apple's water is returned to watersheds for reuse.

Let us know what additional information we can provide that would be helpful.

Thanks, Nick! We'll run by our team quickly and get back to you with any feedback on our end.

Let us know if anything else would be helpful. I think we also still owe you some points on Apple Park, which we can send tomorrow.

On Aug 14, 2021, at 2:36 PM, Conger, Nick < Conger. Nick@epa.gov> wrote:

Hi again team – here is a shot at how the Q&A may look. I don't mean to be overly prescriptive, but I do think our boss would appreciate a clear breakdown of who's asking what, in each of the three buckets (climate, public/private partnership, EJ). Does this work on your side? Of course this should not be verbatim...I'm sure they'll both want to use their own words!

- 1. **U does** introduction and brief recap of AP tour. **MSR comments** on what he saw and the exciting work at Apple.
- 2. <u>LJ asks MSR</u>: In light of recent IPCC report, the climate crisis seems more urgent than ever. President Biden recently committed to an enhanced target of 50-52 percent reduction from 2005 levels in greenhouse gas pollution by 2030. What role is EPA playing to help put America on a path to achieve that commitment?

- 3. MSR asks LJ: Apple has also set a very ambitious climate target of 100 percent carbon neutral for its supply chain and products by 2030, building on your progress of achieving carbon neutrality today for corporate emissions worldwide. How are you going to accomplish that goal?
- 4. <u>Lasks MSR</u>: We all saw that the Senate passed the Bipartisan Infrastructure Deal with 69 votes (!!) last week. What would that legislation mean for EPA, and for its efforts to fulfill its mission and your priorities as Administrator?
- 5. MSR asks LI: It's clear that the Biden administration is committed to climate action and sustainability. Congress has also made important headway under Democratic control. How is Apple working to advance our public-private partnerships, as we work in tandem to confront the climate crisis and other pressing environmental challenges?
- 6. <u>Lasks MSR</u>: Under your leadership, EPA has already demonstrated action on climate, but you've also said that you're putting Environmental Justice at the DNA of EPA. What do you mean by that, and what are some ways you're making a tangible difference in overburdened communities in America?
- 7. MSR asks LJ: You were a champion for EJ as EPA Administrator, and you've brought that leadership to Apple. Can you talk about what kind of an impact Apple is having on low-income and minority communities, and not just in the U.S., but globally as well?

Subject: Re: August 17 visit

Thank you Keri! Will let Rosemary speak to the schedule question- I believe she was checking with our team on that.

Yes, we are planning to bring a videographer to capture some content of the visit. Happy to clear any content through you before we use it publicly. Hope that works.

This flow below looks great. I can take a stab at breaking it down a step further to outline broad Qs relating to these subjects, and "assign" them to each principle if that's ok. Will do that this afternoon.

Nick Conger EPA Press Secretary 202-941-1116

On Aug 14, 2021, at 10:30 AM, Keri Fulton < <a href="mailto:keri\_fulton@apple.com">keri\_fulton@apple.com</a>> wrote:

Hi all,

Thank you so much for the call last night. Below is a proposed flow for the fireside chat. We can send over more detailed suggested questions for them both later today if this seems right to you.

We had a few follow up questions for you:

- Is there additional time available at the back end of the visit?
- Are you planning to bring both a photographer and videographer? We actually have capabilities and are planning to do both if that is easier. Given active R&D on site we'd need to clear any final images that would be shared with our team.

Let us know if anything else would be helpful.

Thanks!

Keri

# Fireside chat flow:

- Introduction and brief recap of AP tour
- Urgent need for climate action following IPCC report looking ahead to COP
- Lisa asks Administrator Regan about EPA's focus
- Administrator Regan talks about why legislation is important
- Lisa notes Apple engaged in public sector Clean energy standard and SEC disclosure
- Two discuss role of business and government working together
- Discuss impact on local communities, environmental justice
- Administrator Regan discusses EPA EJ efforts
- Lisa discusses EPA EJ efforts, and now Apple efforts

Subject: Re: August 17 visit

Hi all,

Thanks again for the call yesterday. A few thoughts on the fireside chat/press side for you all:

- We recommend a pre-recorded fireside chat that we release on Wednesday as amplification of your visit and to give our team time to edit. We are thinking this might work well for Axios, but would love to discuss what's a good fit on your end.
- We pitch the photos and a quote from Lisa and the Administrator on the visit to press more widely and point to the video when it goes live.
- We consider a joint interview with an outlet like Grist covering similar topics to the fireside chat.

Nick, if you have a few min today, would love to compare notes on targets and if that works ok. I can also share more on our possible news. Let me know and here's my cell too if you find yourself w a min: 240-595-2691

On schedule, we'll follow up with a more descriptive timeline and proposed stops so that we can make sure it works for you all.

Best,

Keri

## Hello Arvin,

We have received your request to meet with Michal Freedhoff and we would like more information, please. I have attached a form to help us facilitate this request. Please fill out the form and "reply all" when completed. If there is a statute, regulation, and/or submission you are most interested in discussing, please be sure to specify within the form.

Please note, this form is not a confirmation of attendance but has been designed to assist in planning and participation in events and activities.

I will be your point of contact so feel free to reach out with questions or if I can be of any assistance.

We look forward to connecting with you soon!

Thank you, Catie

Hi Arvin,

Great! We'll schedule shortly but first we need the email addresses of the Apple participants. We have the names from the external meeting form but not the emails.

In terms of our participant list, we're still finalizing but so far we have Michal Freedhoff and Jennie Romer from OCSPP and Ale Nunes from OAR. We'll give you a full participant list later closer to the meeting.

Best, Gloria

Subject: RE: Apple briefing

Hi Arvin,

Thanks for clarifying that this is a fairly high level meeting where Apple would be presenting their projects related to DFE, Safer Choice, and Energy Star. OAR is asking for more details in relation to what type of projects you'll be presenting: hardware, data, etc.. As usually, all of these questions are to make sure we have the right people in the room.

Best, Gloria

Subject: Connecting - EPA & Corporate EcoForum

By way of this email, I would love to introduce you to PJ Simmons, chairman and co-Founder of Corporate Eco Forum - which convenes executives from leading corporations (including Apple) to share best practices around key sustainability issues. He is hoping to engage Administrator Regan on some upcoming efforts, so I wanted to put the two of you in touch to discuss opportunities.

PJ - Rosemary and I had the privilege of working together at the EPA under Obama, and she now serves as EPA's Associate Administrator for Public Engagement and Environmental Education.

Do let me know how I can further assist in making this connection.

Best. Alisha

Subject: Invitation: EPA Administrator Michael S. Regan invites you to an environmental justice event - Warren County, NC,

Saturday, September 24, 2022

Hey Alisha and Michelle,

Hope you all are well. The Administrator is hosting an event next Saturday, September 24<sup>th</sup> in Warren County North Carolina and he wants Lisa Jackson there if she's available. This event came together extremely quickly but we're working hard to get some key folks there for this special moment for him and the agency. See the details for the event below. Let me know if you have any questions.

## Background (close-hold)

Administrator Michael S. Regan will be traveling to Warren County, NC, the site of protests 40 years ago that sparked the environmental justice (EJ) movement, to announce the launch of EPA's Office of Environmental Justice and Civil Rights. This is a significant reshaping of the agency that elevates Environmental Justice and External Civil Rights as a major priority for the agency. This new office puts EJ and civil rights on par with our offices of air, land, and water, and will include a Senate confirmed leader. The Administrator will deliver a speech at an event including EJ leaders from across the country. This will further advance President Biden's commitment to deliver environmental justice for overburdened communities.

#### **Event Invitation**

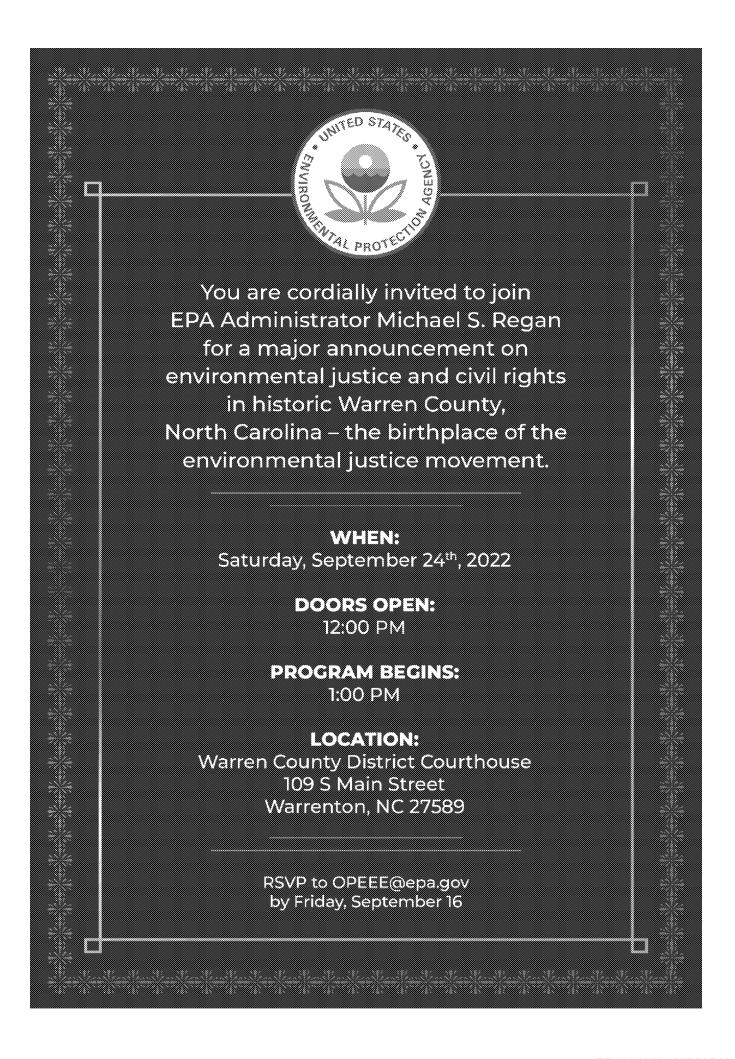

EPA Administrator Michael S. Regan requests the pleasure of your company for a major agency announcement event on environmental justice. Please find the official invitation below.

Kindly RSVP to OPEEE@epa.gov. Provide your full name, city, and state of residence and phone number for yourself and your guest.

This invitation is NON-TRANSFERABLE.

Please RSVP by Friday, September 16, 2022.

For questions, please direct them to Catherine Diaz at OPEEE@epa.gov or by phone at 202-815-7825.

Subject: Re: August 17 visit

Hi all,

Thanks again for the call yesterday. A few thoughts on the fireside chat/press side for you all:

- We recommend a pre-recorded fireside chat that we release on Wednesday as amplification of your visit and to give our team time to edit. We are thinking this might work well for Axios, but would love to discuss what's a good fit on your end.
- We pitch the photos and a quote from Lisa and the Administrator on the visit to press more widely and point to the video when it goes live.
- We consider a joint interview with an outlet like Grist covering similar topics to the fireside chat.

Nick, if you have a few min today, would love to compare notes on targets and if that works ok. I can also share more on our possible news. Let me know and here's my cell too if you find yourself w a min: 240-595-2691

On schedule, we'll follow up with a more descriptive timeline and proposed stops so that we can make sure it works for you all.

Best, Keri

Hi there!

We are looking forward to the visit. You can share with us as a PDF and we will load it up. We will also have this outline of the conversation at a high level in a PDF on the iPad for them both so they are not having to read from the iPad and have the same reference points. Let us know if you have any concerns with this:

- Introduction and brief recap of AP tour
- Shift to urgent need for climate action following IPCC report looking ahead to COP
- Lisa asks Administrator Regan about EPA's priorities under his leadership
- Administrator Regan discusses infrastructure package and asks Lisa about public/private sector action
- Lisa discusses how Apple engaged has engaged on policy pointing to support for a Clean Energy Standard and SEC disclosure
- Administrator Regan asks Lisa about Apple's 2030 goal
- Lisa asks Regan about importance of environmental justice as a priority for EPA
- Regan discusses EPA EJ efforts and asks Lisa about how Apple is thinking about this
- Lisa discuss EPA EJ efforts, and now Apple efforts and our Impact Accelerator announcement

We are hoping having an outline to reference will ensure we cover all of the topics while keeping the flow more natural. We can also pause if we need to do a redo/retake any questions at the end to make sure we've hit all of your points.

Thanks, Keri

Happy to help.

Sharing some key highlights of our environmental progress:

- 100% renewable electricity: We continue to source 100 percent renewable electricity for all offices, retail stores, data centers and co-located facilities in 44 countries. 90% of the renewable energy is sourced from Apple-created projects.
  - Carbon neutral operations: Beginning April 2020, Apple is carbon neutral for our corporate emissions.
- Carbon footprint: We've committed to carbon neutrality by 2030 and to reducing emissions by 75% from 2015 levels —so far, we've reduced our comprehensive carbon footprint by 40%.
- Disassembly: Our "Daisy" robots disassemble iPhone devices to recover more material inside. Our newest robot, "Dave," disassembles modules like the Taptic Engine to enable recovery of materials like rare earth elements and tungsten.
- Elysis: In May 2018 aluminum manufacturers Alcoa and Rio Tinto announced a joint venture, partially funded by Apple, to research and develop a new technically that eliminates greenhouse gas emissions from the traditional aluminum smelting process. In December 2019, we announced Apple had bought the first ever commercial batch of carbon-free aluminum, which is currently under development on the 16-inch MacBook Pro.
  - Energy consumed by Apple products: In 11 years, we've reduced average product energy use by 73%.
- Green bonds: We've issued \$4.7B in green bonds. Most recently, we issued USD \$2.2 billion in November 2019, dedicated to helping achieve our carbon neutral goal. Apple has allocated more than half of its total Green Bond spend \$2.8 billion.
- Low-carbon design: We decreased our 2019 carbon footprint by 4.3 million metric tons by increasing efficiency and using recycled and other low-carbon aluminum in our products.
- Packaging: 100% of the wood fiber in our product packaging is recycled or comes from responsibly managed forests; and since 2015, we've reduced plastics in our packaging by 65%. We plan to eliminate plastics in our packaging by 2025.
- Recycled rare earth elements: All iPhone, iPad, Mac, and Apple Watch devices released in the past year are made with recycled content, including 100 percent recycled rare earth elements in the iPhone Taptic Engine a first for Apple and for any smartphone
- Recycled content: MacBook Air with Retina display (2020) is made with more than 40 percent recycled content, including 100 percent recycled aluminum in the enclosure.
- Refurbish and recycling: We sent 10.4 million devices to be refurbished for new users in 2020, and we directed 39,000 metric tons of e-waste to recycling globally.
- Smarter chemistry: For the third year in a row, the Mind the Store campaign, by the NGO Safer Chemicals, Healthy Families, gave Apple an A+ rating for our work to eliminate harmful chemicals in products and packaging.
- Supplier clean energy: Over 110 suppliers have committed to 100 percent renewable electricity, with nearly 8 GW of clean energy commitments, of which 4 GW is already operational. Our new goal is to transition 100% of our manufacturing supply chain to 100% renewable electricity by 2030.
- Water: In 2020, we helped 172 suppliers conserve more than 10.8 billion gallons of water, bringing the cumulative savings since the launch of our Clean Water program in 2013 to 41 billion gallons.
- Worker safety: We've enrolled 100 percent of supplier final assembly sites in our Safer Cleaners program, impacting more than 80,000 workers. In 2020, we were the first consumer electronics company to receive the EPA Safer Choice Partner of the Year Award for the use of safer process chemicals.
- Zero waste: We've achieved Zero Waste to Landfill certifications at all supplier final assembly facilities for core product lines. In fiscal year 2020, we diverted more than 70% of waste across Apple facilities including retail stores. We have active Zero Waste to Landfill goals for retail, corporate facilities and our supply chain.

Highlights of Apple's campus that we plan to note as part of the visit include:

- There are EV charging stations located in the underground parking structure, and additional charging stations located in the aboveground parking structures on the south end of campus.
- In addition, there are 1,300 bicycles provided for employees to get around campus, and a fleet of EV carts that are used by the Landscaping, Security, and Maintenance teams.
- Caffe Macs provides food and beverages to Apple Park's 15,000 employees. Food and beverages are provided in compostable containers, and waste is managed towards Apple's zero waste goal. Each office area includes

recycling and compost bins for employees to participate in the effort towards zero waste. Overall, 70% of waste generated at Apple facilities is diverted from landfill.

- The natural ventilation system brings fresh air from outside in through the canopies that gently shade the interior and exterior windows. This highly innovative design significantly reduces our energy usage. Temperature is maintained at a comfortable range of 68 to 78 degrees Fahrenheit. The building can be put into mechanical airconditioning mode on hot days or during other circumstances.
- The massive retractable glass doors in this section are the biggest of their kind ever constructed; they can be opened to allow additional fresh air to circulate through the building.
- As of April 2020, we are carbon neutral for our corporate emissions, including emissions from all of our facilities, as well as employee commute and business travel.
- Apple Park relies on 100% renewable electricity. At Apple Park, electricity is supplied by a large 17MW array of solar panels, here on the roof of the Ring Building as well as large arrays on the aboveground parking structures on the south end of campus. Energy is stored in a series of Bloom Energy biogas fuel cells, with a 4 MW capacity, located adjacent to the south parking structure.
- Apple Park offers over 120 acres of green space, with numerous pedestrian and bike paths. Apple Park was designed to recognize the heritage of the land and the many kinds of landscapes in California. There are over 9,000 native and drought-resistant trees planted throughout the campus.
- Apple Park has nearly three acres of fruit trees more than 800 trees in total. The 24 varietals include plum, pear, apple, cherry, apricot, and persimmon. The fruit is harvested 6 months of the year and used in the meals made at Apple Park's main restaurant, Caffe Macs.
- Apple Park is also home to over 150 different species, including lizards, hawks, and rabbits. Apple has a partnership with the Wildlife Center of Silicon Valley in case of an animal in need of wildlife rescue.
- Thousands of shrubs and ground-cover plants are planted across the campus, representing a wide variety of drought-tolerant and California-native species.
  - 54% of Apple's water is returned to watersheds for reuse.

Let us know what additional information we can provide that would be helpful.

Hi there,

Circling back on this. We have a ton of moving pieces but I was finally able to lock down the time for this event — We're currently holding 12:00pm — 1:30pm. We were able to only add an additional 15 mins on the back end. In regards to lunch, we wont be able to stay for a formal lunch because we are on an extremely tight timeline. However, would it be possible to coordinate box lunches for the team after the visit that we can take with us? If so, Kathleen Lance who is doing today's walk thorough will coordinate that with your team.

Let us know if anything else would be helpful. I think we also still owe you some points on Apple Park, which we can send tomorrow.

On Aug 14, 2021, at 2:36 PM, Conger, Nick <Conger.Nick@epa.gov> wrote:

Hi again team – here is a shot at how the Q&A may look. I don't mean to be overly prescriptive, but I do think our boss would appreciate a clear breakdown of who's asking what, in each of the three buckets (climate, public/private partnership, EJ). Does this work on your side? Of course this should not be verbatim...I'm sure they'll both want to use their own words!

- 1. <u>U does</u> introduction and brief recap of AP tour. <u>MSR comments</u> on what he saw and the exciting work at Apple.
- 2. <u>LI asks MSR</u>: In light of recent IPCC report, the climate crisis seems more urgent than ever. President Biden recently committed to an enhanced target of 50-52 percent reduction from 2005 levels in greenhouse gas pollution by 2030. What role is EPA playing to help put America on a path to achieve that commitment?
- 3. MSR asks LJ: Apple has also set a very ambitious climate target of 100 percent carbon neutral for its supply chain and products by 2030, building on your progress of achieving carbon neutrality today for corporate emissions worldwide. How are you going to accomplish that goal?
- 4. <u>Lasks MSR</u>: We all saw that the Senate passed the Bipartisan Infrastructure Deal with 69 votes (!!) last week. What would that legislation mean for EPA, and for its efforts to fulfill its mission and your priorities as Administrator?
- 5. MSR asks LJ: It's clear that the Biden administration is committed to climate action and sustainability. Congress has also made important headway under Democratic control. How is Apple working to advance our public-private partnerships, as we work in tandem to confront the climate crisis and other pressing environmental challenges?
- 6. <u>LJ asks MSR</u>: Under your leadership, EPA has already demonstrated action on climate, but you've also said that you're putting Environmental Justice at the DNA of EPA. What do you mean by that, and what are some ways you're making a tangible difference in overburdened communities in America?
- 7. MSR asks LJ: You were a champion for EJ as EPA Administrator, and you've brought that leadership to Apple. Can you talk about what kind of an impact Apple is having on low-income and minority communities, and not just in the U.S., but globally as well?

Subject: Re: August 17 visit

Thank you Keri! Will let Rosemary speak to the schedule question- I believe she was checking with our team on that.

Yes, we are planning to bring a videographer to capture some content of the visit. Happy to clear any content through you before we use it publicly. Hope that works.

This flow below looks great. I can take a stab at breaking it down a step further to outline broad Qs relating to these subjects, and "assign" them to each principle if that's ok. Will do that this afternoon.

Hi all,

Thank you so much for the call last night. Below is a proposed flow for the fireside chat. We can send over more detailed suggested questions for them both later today if this seems right to you.

We had a few follow up questions for you:

- Is there additional time available at the back end of the visit?
- Are you planning to bring both a photographer and videographer? We actually have capabilities and are planning to do both if that is easier. Given active R&D on site we'd need to clear any final images that would be shared with our team.

Let us know if anything else would be helpful.

Thanks!

Keri

#### Fireside chat flow:

- Introduction and brief recap of AP tour
- Urgent need for climate action following IPCC report looking ahead to COP
- Lisa asks Administrator Regan about EPA's focus
- Administrator Regan talks about why legislation is important
- Lisa notes Apple engaged in public sector Clean energy standard and SEC disclosure
- Two discuss role of business and government working together
- Discuss impact on local communities, environmental justice
- Administrator Regan discusses EPA EJ efforts
- Lisa discusses EPA EJ efforts, and now Apple efforts

Subject: Re: August 17 visit

Hi all,

Thanks again for the call yesterday. A few thoughts on the fireside chat/press side for you all:

- We recommend a pre-recorded fireside chat that we release on Wednesday as amplification of your visit and to give our team time to edit. We are thinking this might work well for Axios, but would love to discuss what's a good fit on your end
- We pitch the photos and a quote from Lisa and the Administrator on the visit to press more widely and point to the video when it goes live.
- We consider a joint interview with an outlet like Grist covering similar topics to the fireside chat.

Nick, if you have a few min today, would love to compare notes on targets and if that works ok. I can also share more on our possible news. Let me know and here's my cell too if you find yourself w a min: 240-595-2691

On schedule, we'll follow up with a more descriptive timeline and proposed stops so that we can make sure it works for you all.

Best, Keri

Hey Alisha and Michelle,

Hope you all are well. The Administrator is hosting an event next Saturday, September 24<sup>th</sup> in Warren County North Carolina and he wants Lisa Jackson there if she's available. This event came together extremely quickly but we're working hard to get some key folks there for this special moment for him and the agency. See the details for the event below. Let me know if you have any questions.

#### Background (close-hold)

Administrator Michael S. Regan will be traveling to Warren County, NC, the site of protests 40 years ago that sparked the environmental justice (EJ) movement, to announce the launch of EPA's Office of Environmental Justice and Civil Rights. This is a significant reshaping of the agency that elevates Environmental Justice and External Civil Rights as a major priority for the agency. This new office puts EJ and civil rights on par with our offices of air, land, and water, and will include a Senate confirmed leader. The Administrator will deliver a speech at an event including EJ leaders from across the country. This will further advance President Biden's commitment to deliver environmental justice for overburdened communities.

#### **Event Invitation**

EPA Administrator Michael S. Regan requests the pleasure of your company for a major agency announcement event on environmental justice. Please find the official invitation below.

Kindly RSVP to <a href="mailto:OPEEE@epa.gov">OPEEE@epa.gov</a>. Provide your full name, city, and state of residence and phone number for yourself and your guest.

This invitation is NON-TRANSFERABLE.

Please RSVP by Friday, September 16, 2022.

For questions, please direct them to Catherine Diaz at <a href="mailto:OPEEE@epa.gov">OPEEE@epa.gov</a> or by phone at 202-815-7825.

## Lisa P. Jackson

Ex. 6 Personal Privacy (PP)

November 29, 2021

The Honorable Michael S. Regan Administrator U.S. Environmental Protection Agency 1200 Pennsylvania Avenue, NW Washington, DC 20004

#### Dear Administrator Regan:

| I am writing to express my strong support for the nomination of Ex. 6 Personal Privacy (PP) to the |
|--|
| position of Region 9 Administrator at the U.S. Environmental Protection Agency.                    |
| is a collaborative leader who has dedicated career to protecting human                             |
| health and the environment. has demonstrated a sustained ability to tackle                         |
| complex challenges and has strong relationships, respect and trust across a number of              |
| stakeholders in Eks Brassonial Privacy (PPP) and nationally.                                       |
| If selected as Region 9 Administrator is committed to centering environmental                      |
| justice communities in the Region's work, and clearly understands the need and                     |
| opportunities for partnership between states and the federal government in                         |
| implementing goals around climate, equity, justice, and jobs. I am confident that                  |
| will work to ensure stakeholders across all states in the region have an equal voice and           |
| seat at the table.   |
| I believe that experience, expertise, relationships, and values will position                      |
| to be a great fit to lead EPA's Region 9. I fully support nomination and look                      |
| forward to working with to advance environmental justice and increase access to                    |
| reliable, clean energy in this critical region.  |

Sincerely yours,

Lisa P. Jackson

26 October 2022

Jennie Romer
Deputy Assistant Administrator for Pollution Prevention
US Environmental Protection Agency
1201 Pennsylvania Ave, NW
Washington, DC 20004

Ms. Romer,

Thank you for taking the time to meet with us a couple of weeks ago. We appreciate the time that you and your EPA colleagues dedicated to discuss this important issue.

We remain hopeful that we will see a FAR proposed rulemaking soon that will recommend modifying CFR 48 Section 23 to allow EPA to designate additional ecolabels and standards for electronics that will enable listing in EPA's Sustainable Marketplace. We reiterate our request that EPA support the ability for additional ecolabels and standards to be eligible for the Sustainable Marketplace as they are for all other product categories.

As we noted in our conversation, there are several ecolabels and standards that, if given the opportunity to be on the Sustainable Marketplace, could be, or are, similar in scope and function to EPEAT. One of the consequences of the lack of competition in this space is that without the ability to be considered for this purpose, not all standards and ecolabels are being updated or developed in a manner that aligns to the EPA Guidelines for the assessment of Environmental Performance Standards and Ecolabels for Federal Procurement.

In our meeting, we specifically mentioned the TCO standard, commonly used in the EU. While it is not our intent to promote this particular ecolabel, we raised it as an illustrative example of other strong and robust ecolabels for electronics that exist, but which are not eligible for US government procurement use due to the FAR's requirement of one ecolabel - EPEAT. We have attached a brief comparison of the EPEAT and TCO programs and topics. If the FAR is changed, EPA would be able to evaluate TCO and other ecolabels and standards that may be sufficiently strong and robust to be used for US government procurement.

As a result of EPEAT being set up as a monopoly in the Sustainable Marketplace for electronics, procedures and program decisions were given leeway to move EPEAT further away from voluntary consensus processes that protect the ability for parties with a material interest to access to the standard setting process. This is contrary to an open standards setting process and harms competition and continuous improvement.

One example of this is limiting participation to only 5 manufacturers on a technical committee, when approximately 50 manufacturers have products on the registry and are directly impacted. This lack of representation of the affected industry members prevents the development of meaningful measures and baseline performance levels based on collaboration across

Global Headquarters 700 K Street NW, Suite 600 Washington, D.C. 20001, USA Europė Office Rue de la Loi 227 Brussels - 1040, Belgium +32 (0)2-321-10-90

manufacturers and products with a wide range of unique characteristics. Further, it could result in outcomes that benefit the participating members with a competitive impact on the excluded members. It also requires participating members to carry the needs and concerns of the entire industry, which is impossible to do well.

We appreciate that EPA is consistently capacity constrained and would also like to see more staffing for this important work. We realize that the EPA may not be able to engage across several standards as at the same level of engagement it does for EPEAT. EPA plays a central role in maintaining the Sustainable Marketplace and we are asking you and your team to promote competition and environmental improvement by considering more ecolabels and standards, in addition to EPEAT, that can be eligible for listing in the Marketplace. This is supported by President Biden's push for competition in federal procurement.

As the landscape of standards and ecolabels for electronics evolves, we would be interested in recurring engagements with EPA to collaborate on emerging requirements in these programs. It is in our mutual best interest to ensure that EPA has the information it needs to make the decisions that will need to be made regarding additional standards and ecolabels and that those programs can achieve acceptance by the EPA.

We appreciate your attention to this matter and welcome further conversations,

Respectfully,

Chris Cleet, QEP

Subject: IMPORTANT UPDATE - OSD ManTech Virtual Convening for DMCSP and AMCC Communities

Attachments: Virtual Convening Agenda.docx

#### Colleagues -

We look forward to seeing you this week in our Virtual Convening of Defense Manufacturing Community Support Program (DMCSP) and American Manufacturing Community Collaborative (AMCC) communities. We are scheduled for one (1) 90-minute session each day 2-3 November, at 10:00 a.m. to 11:30 a.m. EASTERN.

It may be the case that the calendar invites with Zoom link you were sent previously did not auto-populate your calendar. I have included all log-in information for this event below the signature block here as a backup.

Depending on security and privileges settings on your end, you may or may not have this invite in your current calendar. This technical problem is not universal. Some people have had no issue, some people have received the email with no calendar invite created, and some people have nothing at all. This appears to be a problem with how some gateways receive calendar invites from this server.

Please check your electronic calendar to ensure you have a placeholder for these sessions. If so, you are likely fine. If not, the information below should ensure you have no problems getting into the meetings.

For your convenience, the agenda is attached again here.

Sorry for the tech glitch. We are working now to find the source.

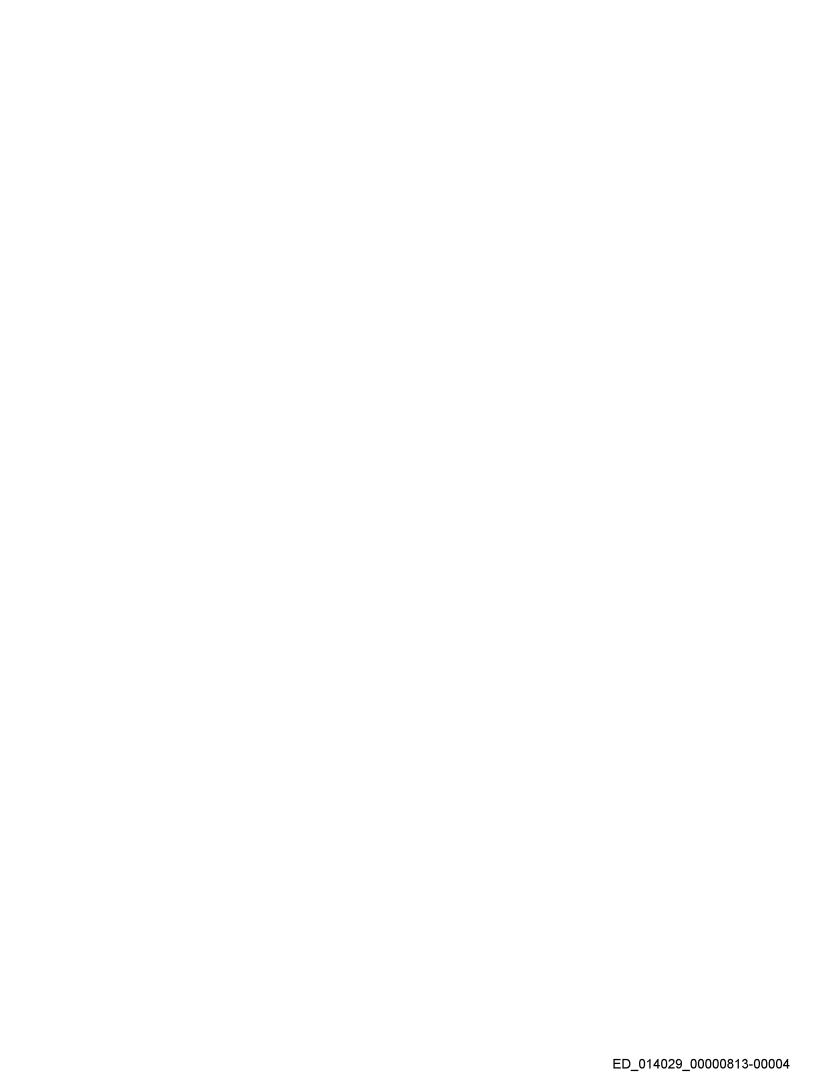

Regards, Michael Gilroy

Michael Gilroy
Senior Workforce Advisor
OSD Manufacturing Technology (ManTech)
Education and Workforce Development (EWD)

# OSD ManTech Education and Workforce Development Network Virtual Gathering November 2-3, 2022/10:00-11:30 EASTERN

#### Wednesday, November 2, 2022

Welcome and Introduction 10:00-10:05 EASTERN

Michael Gilroy

Senior Workforce Development Advisor

Office of the Secretary of Defense, Manufacturing Technology Program

Institutionalizing Quality Design Across Non-Degree Workforce 10:05-10:25 EASTERN

**Programs at Community Colleges** 

Shalin Jyotishi

Senior Analyst, Education & Labor, New America

Fellow, Center for 4th Industrial Revolution, World Economic Forum

Developing a Credential 10:25-10:45 EASTERN

**Paul Perkins** 

President, Amatrol Inc.

Inclusive Innovation and Workforce Development in Manufacturing 10:45-11:05 EASTERN

**Andrew Stettner** 

Director of Workplace Policy

The Century Foundation

Michelle Burris

Fellow/Cohort Manager, Industry and Inclusion Team

The Century Foundation

Way Forward in 2023 11:05-11:25 EASTERN

Michael Britt-Crane

Education and Workforce Development Lead

Office of the Secretary of Defense, Manufacturing Technology Program

Thursday, November 3, 2022

Welcome and Recap 10:00-10:05 EASTERN

Michael Gilroy

Senior Workforce Development Advisor

Office of the Secretary of Defense, Manufacturing Technology Program

# OSD ManTech Education and Workforce Development Network Virtual Gathering November 2-3, 2022/10:00-11:30 EASTERN

**Bringing Digital Manufacturing to Scale** 

10:05-10:25 EASTERN

John Hart PhD

Professor of Mechanical Engineering

Director, Laboratory for Manufacturing and Productivity

Massachusetts Institute of Technology

Scaling Advanced Manufacturing Training Through
Online Learning, AR/VR Simulations and Digital Games

10:25-10:45 EASTERN

Erik Verlage

Research Scientist

Department of Materials Science and Engineering

Massachusetts Institute of Technology

John Liu

Lecturer, Department of Mechanical Engineering

Massachusetts Institute of Technology

Tackling CTE Teacher Shortages 10:45-11:05 EASTERN

**Zach Curtis** 

Manager of Government Relations

Association for Career and Technical Education

Building Your Network of Networks: A Practical Approach to 11:05-11:25 EASTERN

Forming Your Regional Ecosystem

David Beurle CEO, FutureiQ
